

USB-C to USB-A Adapter 5Gbps, 3-Pack / USB 3.1 Gen 1, OTG, Data and Charging

SKU: USBCUSBA3PK

MSRP: \$11.99

UPC: 810189122208

- **5Gbps SuperSpeed Data Transfer:** USB 3.2 Gen 1 supports transfer rates up to 5Gbps — roughly 10x faster than USB 2.0 — for moving large files, images, and backups in seconds.
- **Three Adapters Per Pack:** Keep one at the desk, one in the laptop bag, and one in the deployment kit. Ideal for outfitting fleets and shared workstations without repeat ordering.
- **Connect Any USB-A Device:** Adds a full-size USB-A port to USB-C laptops, tablets, and phones for flash drives, external SSDs, keyboards, mice, printers, headsets, and hubs.
- **Durable Metal Housing:** Alloy connector shell dissipates heat during sustained transfers and resists wear far better than plastic-bodied adapters, holding up to repeated plug cycles.
- **Plug and Play:** No drivers, no software, no setup. Compact enough to leave attached to a cable or stow in a pocket. Backward compatible with USB 2.0 and 1.1 devices.

Add a full-size USB-A port to any USB-C device with this three-pack of compact adapters. Built to the USB 3.2 Gen 1 standard, each adapter delivers data rates up to 5Gbps — fast enough to pull a full external drive backup or offload high-resolution media without waiting on the connection.

The USB-C plug connects to your laptop, tablet, or phone, while the USB-A receptacle accepts the peripherals you already own: flash drives, portable SSDs, keyboards, mice, card readers, printers, headsets, and powered hubs. No drivers or configuration are required — connect the adapter and the device is recognized immediately.

An alloy housing manages heat during long transfers and stands up to daily plug and unplug cycles, and the low-profile body fits cleanly alongside adjacent ports. Shipping three to a pack makes this a practical standard-issue accessory for laptop refresh programs, hot-desking environments, and field deployment kits.

Note: this adapter carries data and power only. It does not pass video signals and cannot be used with USB-C to HDMI or DisplayPort adapters.

Bull Creek Tech

Connector A	USB-C (male)
Connector B	USB-A (female)
Standard	USB 3.2 Gen 1 (USB 3.0)
Data Transfer Rate	Up to 5Gbps
Backward Compatibility	USB 2.0 (480Mbps), USB 1.1 (12Mbps)
OTG Support	Yes
Video Output	Not supported
Housing Material	Aluminum alloy
Drivers Required	None — plug and play
Quantity	3 adapters per pack
Country of Origin	Vietnam

System Requirements

Compatible with laptops, tablets, and smartphones equipped with a USB-C port, including Windows, macOS, ChromeOS, Android, and iPadOS devices. No operating system drivers or software installation required.

Warranty

2 year limited
